

Environmental Compliance Monitor

The Environmental Compliance Monitor will provide construction compliance monitoring for a large transportation project based in Los Angeles, California. The Environmental Compliance Monitor will serve as a liaison between the management team and the construction contractor to facilitate compliance with environmental mitigation measures and permit conditions. The Environmental Compliance Monitor will work a standard 8 hours shift but will need some flexibility in variable shift schedules. They must also be willing to respond to “on-call” assignments, as needed.

Education and Training:

- BS in Planning, Environmental Science, Environmental Studies, Engineering, or a Related Field

Job Responsibilities

- Environmental construction monitoring, field coordination and scheduling, providing specialized assessments and surveys, report preparation, construction monitoring, and other services related to compliance with the project’s regulatory requirements.
- Issue non-compliance events, maintain records of compliance activities, and provide daily and weekly reports.
- Monitor compliance with traffic, parking, acoustic and vibrational, air quality, business mitigation, and other areas.
- Coordinate and communicate with construction staff and management to ensure compliance with environmental permits.

Qualifications:

- Basic knowledge and familiarity with environmental regulations, including CEQA/NEPA, planning requirements, and other environmental policies in California.
- Familiarity working with multidisciplinary teams, clients, agencies, and consultants.
- Ability to maintain professional relationships with diverse groups including field staff, contractors, and clients.
- Aptitude for effective communication and conflict resolution between project personnel.

Experience:

- Between 3 to 7 years of professional experience in environmental planning, consulting, or a similar field.
- Compliance monitoring and reporting experience on similar projects is preferred.
